

JOURNAL OF
CHINESE SOIL AND WATER CONSERVATION

Vol. 54, No.1

March 2023

CONTENTS

Papers

1. A Preliminary Study on Rainfall Infiltration Leading to Rock Slope Failure and Pore Pressure Variation through Physical Models Simulated using 3DEC -----
----- *Chih-Ying Yao, Yu-Sen Lai, Chia-Ming Lo*----- 1
2. Rainfall Threshold and Signal Interpretation for Gravelly Debris Flows -----
----- *Hsien-Ter Chou, Yi-Syu Ciou, Chia-Min Hsu, Chih-Hsuan Huang, Ching-Jen Lin,*
----- *Ben-Huan Guo*----- 16
3. Theoretical and Experimental Analyses of Flow Instability in High Gradient Channels--
----- *Hsun-Chuan Chan, Po-Wei Lin, Tung-Yuan Hsieh, Yi-Ting Chung, Yi-Da Chien*-----27
4. Spatiotemporal Characteristics of Landslide Evolution in the Tsengwen Reservoir
Watershed from the Assessment of Landslide Activity Through Spatiotemporal Hotspot
Analysis----- *Yu-Ci Chen, Chun-Hung Wu*-----38
5. Morphological Evolution Mechanism of Gravel-bed Braided River through Numerical
Simulation of Da-jia River ----- *Shih-Yen Hsu, Shaohua Marko Hsu*-----48
6. Soil Depth Estimation and the Influence of Soil Depth and Vegetation Cover on Slope
Stability in the Liukuei Experimental Forest-----
----- *Shiang-Yue Lu, Shao-Wei Wu, Ming-Yuan Sun*-----60

Technical Notes

7. Vulnerability Assessment of Buildings and Residents for the Catastrophic Debris Flow
in Nansalu Village during Typhoon Morakot-----
----- *Hsien-Ter Chou, Ting-Chi Tsao, Chih-Hao Hsu, Ching-Fang Lee, Chien-Hao Huang*-----70
8. Evaluation of the Technical Feasibility of the Soil and Water Conservation Practices in
Weregen Watershed, Tarmaber District, Ethiopia----- *Kebede Bekele, Tesfaye Mebrate*-----80
